% Species Comp.	14%	<1%	55%		10%	11%				9%			

Comments: Extremely foggy conditions on both deltas made it impossible to survey shallow water bay areas that are usually included in survey, and sometimes have waterfowl present. For this reason it is possible that these estimates may be slightly lower than they should be, however everyone on the survey crew was confident that waterfowl numbers on both areas were extremely low.

White Lake Wetlands Conservation Area Aerial Waterfowl Survey
