THAIS Q. MORCATTY (e-mail: tatamorcatty@yahoo.com.br), JOÃO VALESCCHI (e-mail: joao.vallescchi@mamiraua.org.br), Instituto de Desenvolvimento Sustentável Mamirauá, Caixa Postal 38, CEP 69553-225, Tefé, Amazonas, Brazil; DANIEL G. ROCHA, Instituto Nacional de Pesquisas da Amazônia (INPA), Caixa postal 408, CEP 69011-670, Manaus, Amazonas, Brazil (e-mail: rochadg.bio@gmail.com).

An adult male was captured by hand. This specimen represents a range extension of approximately 350 km from the closest known locality in eastern Texas (Dixon 2013, op. cit.). This is not a species that would be considered common in the pet trade. It is unclear if this animal represents an individual release or an established population. We hope that sampling conducted over the next several years will allow us resolve this issue.

North American Freshwater Turtle Research Group (NAFTGR) was conducting its summer-long term turtle population study under permit # SPR-0212-019.

ERIC C. MUNSCHER (e-mail: emunsch@swca.com), MIKE FARRELL, and CHRIS COLLINS, SWCA Environmental Consultants, Houston, Texas 77040, USA; JORDAN GRAY, The Houston Zoo, 6200 Hermann Park Dr, Houston, Texas 77030, USA.
